DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 1/24/05 has been considered by the examiner.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 10, 12-18, 20-26, and 28-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Kriegler et al. (US 5,492,189 A).

Kriegler et al. discloses a parallel-hybrid vehicle comprising an electric engine A2, an internal combustion engine A1 operating at a steady-state, a CVT transmission P (col. 2, line 61), a battery S, and a controller MP, for driving wheels (not shown), as shown in figures 1-5.

With respect to claims 13-16, 21-24, and 29-32, all the CVT structure recited in these claims, such as belts, pulleys, and hydraulics, are all inherently found in conventional CVT's.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2, 19, and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kriegler et al., as applied to claims 10, 18, and 26 above.

Kriegler et al. does not disclose the ICE as being a diesel engine. The use of diesel engines is well-known in the art and it would have been obvious to one having ordinary skill in the art at the time of the invention to have provided the vehicle of Kriegler et al. with a conventional diesel engine in order to increase the power of the vehicle.
